

FullyBeyond 2024

Sponsorship Packages

Who are we?

We are Cal State University Fullerton's student-run designation. We plan to host 300 students for a 24-hour design event in November 2024.

Our goal is to bring together students interested in building meaningful, innovative projects, with the bonus opportunity to network with industry professionals and win prizes!

FullyBeyond's Impact

With our impact, we look to create a dynamic and inclusive environment where students can learn, connect, and express their creativity through hands-on projects. We aim to inspire the next generation and build a vibrant community that leaves a lasting impact on CSUF and beyond.

Why Sponsor FullyHacks?

CSUF is a Hispanic Serving Institute that represents a diverse student body, bringing together people of all backgrounds within the largest university in the CSU system. MacKenzie Scott recently pledged \$40 million to our school, recognizing it as a bastion of learning for first-generation and traditionally underrepresented groups.

At FullyBeyond, we want to do our part in enabling these students to achieve anything they put their mind to. We believe that with your help and support, they can become “Titans” of the industry.

With your help, students can:

- Learn more about how to turn an idea into a business
- Get access to workshops led by industry veterans
- Network with recruiters and tech employees
- Integrate your companies' products in their projects
- Receive awesome swag
