

FullyBeyond 2024

Participant Guide

**FullyBeyond will take place VIRTUALLY,
November 9th - November 10th**

You've made it!
My name's Fully Froggy,
let me show you around!

What's FullyBeyond?

FullyBeyond is Cal State Fullerton's first ever beginner-friendly designathon presented by ACM @ CSUF. Participants will have the opportunity to learn, network, and create a portfolio project- all within 24-hours!

Towards the end of the event, designers will have a chance to showcase their creativity and present to a panel of industry leaders.

What to Expect

Teams

Teams can either be solo or up to a maximum of 4 members per team. Eligible teams must consist only of U.S. college students with an .edu email.

Experience

No prior design experience is necessary. We gladly provide resources like workshops and mentor office hours to help beginners on their journey.

How to Prepare

Before the event begins, we strongly recommend all participants to:

- Get familiar with Figma.
- Join our FullyBeyond Discord to stay updated.
 - Accepted applicants will be emailed the Discord link
- Join our FullyBeyond Devpost to be prepared for submitting your project.
 - <http://fullybeyond2024.devpost.com>

Need a Team?

How to Find a Team

Our Discord server has a **#find-teams** channel where you can connect with other prospective students looking to build a team!

Let them know who you are! Include things like your name, the school you're from, and your experience with UX/UI Design. Feel free to leave a link to your portfolio and or LinkedIn!

Shoot your shot!

Optional Template

Name: Fully

School: CSUF

Experience: Experience with UX Research & Beginner with UI

Portfolio / LinkedIn: LinkedIn.com/in/FullyBeyond

Although it is not required, we encourage you to join a team to make the most of your FullyBeyond experience.

Getting Help

1. Designated Officers

Each team will have its own private channel on Discord. Your designated officer will be part of this channel and can answer the questions directly within the channel.

2. Discord Officers

Officers will have a special role on our Discord server, labeled “Team Support”, making them easy to identify. You can DM them any questions and concerns.

3. General Help Channel

In addition to your private team channel, we've set up a general questions channel in the Discord server for any non-team-specific questions. All participants and officers can see and respond in this channel, making it a great place to ask questions that might benefit others as well.

Feel free to reach out!

Submitting Your Presentation

1. Create a Presentation

The presentation should clearly explain both your design process, research, and the final project. This presentation is your opportunity to showcase the design process your team took, the research you conducted, and the user journey to the solutions you developed under a specific amount of time.

2. Prepare Your Submission

Once your presentation is ready, make sure it is in one of the following formats:

- Google Slides

Ensure that all links within your presentation are accessible.

3. Submit via Google Form

You should be able to access this google form on the dev post.

Make sure to submit your presentation on time! No late acceptances!
